

Electric Floor-Rising ALR Projector Screen

Model: F-120GR

Image Size: 72"-120"

Features:

Electric Floor-Rising Screen: Square aluminum alloy casing with clean, sleek lines, combining simplicity with elegance. Portable and suitable for use in various venues.

Adopts an auto-leveling system, which automatically lowers the screen by about 4 cm after reaching its highest position to maintain a flat and stable surface.

Equipped with a USB trigger, which can be connected to the projector's USB port as needed.

Designed with an electric floor-rising structure — the screen is stored in a long rectangular housing before use, easy to move to different locations without taking up much space.

The overall frame is made of high-quality aluminum alloy, making it easy to install and fix; suitable for floor, wall, or cabinet mounting. The control method is remote control.

Applications:

This product is ideal for bedrooms, meeting rooms, training rooms, and entertainment venues. Especially suitable for ultra-short throw projectors.

Technical Specifications:

Operating Temperature: -20°C to 60°C

Power Supply (optional): 230V/50Hz, 0.485A,115W; 120V/60Hz, 1.1A,115W

Screen Lifting Speed: 6 cm/sec
